Second Report on Cleaner Production Promotional Activities

Project Background:

The concept of Cleaner Production is very simple “prevention is better than cure; a stitch in time saves nine”. It is a preventive environmental strategy for waste minimization and environmental pollution. It is a ‘win-win’ strategy. It protects the environment, the consumer and the worker while improving industrial efficiency, profitability, and competitiveness. The key difference between pollution control and Cleaner Production is therefore one of timing. Pollution Control is an after-the-event, ‘react and treat’ approach while Cleaner Production is a forward looking, ‘anticipate and prevent’ philosophy. Cleaner Production helps reducing environmental pollution, waste minimization, raw material conservation and leads to sustainable industrial development.

GCPC is actively engaged in promotion of Cleaner Production and Clean Technology since its inception in the year 1998. The Department of Forests and Environment, GoG has initiated a proactive step by supporting GCPC in promoting the concept of cleaner production across the State of Gujarat. As a part of this Department of Forests and Environment, Government of Gujarat assigned a project of creating awareness towards promoting the concept of Cleaner Production to industries, students, academicians, personnel engaged with household activities etc.

The Second Report on Cleaner Production Promotional Activities includes the progress of the Cleaner Production Promotion Programme at Industrial Estates and amongst the various other related groups and organizations covering the period from August, 2016 to November, 2016.

Cleaner Production Promotion Programme:

Cleaner Production Promotion Programmes at various industrial estates and amongst the various other related groups were conducted as below.
